forwarded the proposition
statement
11) submitted with a note
on the above subject

flg T // Sd/- for N-dt/10392-968 21/31-10-48

sanction was accorded to an estimate for Rs 8, 81, 660/- under for the underground drainage scheme in the old city of Mysore In ~~para~~ the last para of the said ~~go~~, the chairman, City Improvement Trust Board, Mysore, was requested to submit proposals for the formation of a separate division for the execution of the drainage scheme | A

12) In furtherance of the instructions issued as at 'A' above, the Chairman has now submitted proposals to create an Executive Engineers ~~Div~~ Division in the Trust Board the need to create such a ~~Execute~~ Division is explained in detail in the note flagged K It is seen from this note that apart from the execution of underground drainage, the Trust Board have got other important schemes such as the housing scheme, formation of new layouts and Industrial suburbs, maintenance to various works like slum clearance, formation of roads etc The nature

Serial No

of schemes on hand and of those to be taken up by the Board are noted in the statement flagged, with their respective costs. It is said that this Division has to be created in the interest of efficiency & satisfactory execution of all the important major schemes

Vide proposed statement flag M

13) The present staff in the Engineering section of the Hyderabad Board consists of the following -

1) One Asst Engineer
2) One Overseer
3) Six Sub-overseers (4 permanent & 2 Temporary)

14) If the present proposal to create the Executive Division is accepted, only one Executive Engineer and one Surveyor will be added to the existing staff in the Engineering section of the Board

flag N)

15) The proposition statement received in this behalf has been verified by the Auditor, P W D. It is seen therefrom that by the creation of this Division

Note —Contn Sheet

Serial No

an extra sum of Rs 926 (Rs 925-13-4) per month or Rs 11,110/- per year will be involved The expenditure incurred per month, on the present Engineering staff, is reported to be Rs 1,268-2-7

16) Having regard to the importance of the schemes and the cost involved therein, it is perhaps necessary to sanction the proposal of the Hyderabad Improvement Trust Board, to create an Executive Engineers Division which only results in the appointment of one Executive Engineer on Rs 450-50/2-750 and one Surveyor on Rs 100-8-140-10-200, in addition to the present staff consisting of one Asst Engineer, one overseer and 6 Draftsmen This Division is proposed to be created for a period of five years in the first instance (Vide para 5 of the Chairman's report dt 26-11-48 flg a)

17) The Chief Engineer for Roads and Buildings

4100 / 5113 / 5178/Ind creation of a Executive Division in the Nyasa case

General and Revenue Secretariat | File No | of 194 | PP/F III 2

Serial No

may also be consulted on the proposal at para 16 above

18) The proposal is thus based on the premise that the Nyasaland Trust Board has the services of an Executive Officer. The necessity for the creation of an Executive Engineers Division for attending to the work of the Trust Board, Nyasa, on hand & those contemplated to be taken up may perhaps be examined further by the Chief Engineer Roads & Buildings in consultation with the Chairman of the Trust Board & furnish his considered opinion on the matter before the 10th February 1949 If approved, the file would be referred immediately to the Officer for necessary action

21/4/49

U O No 577 dated, 2-6-49

22) Returned with compliments, with the following remarks

In these days of shortage of building materials, it may not be possible for the Trust Board to self impose such an onerous duty of providing houses to all people in the City

2/6/49

23) The question of providing adequate funds is the next bottle-neck

24) Regarding the underground drainge work The original work connected with this is being attended to by the Trust Board while the maintenance is being looked after the Municipality Here again the availability of materials control and retard the progress

25) The works are not progressing rapidly the main reason for the slow progress is not due to lack of personnel but due to various other causes Whatever might have been the justificatıon

WD 03853—GPB—30 000—11 5 48

for proposing a Division in 1948, I feel that those causes do not exist now and the creation of a Division now, will involve in top heavy Establishment, without proportionate progress The existing proposal of having an Assistant Engineer exclusively for these Trust Board works may continue for sometime till better conditions are obtained

CHIEF ENGINEER R & B
12/1/6

y to Government,)
~~Public Works~~ Department)
General

26/ The ~~of~~ of the Chief Engineer for
reference in paras 22 to 25
R&B on the proposal of the
Engineering Improvement Trust
Board to create an Executive
Engineering Division which results
in the appointment of one Executive
Engineer and one Surveyor, in
addition to the existing staff
referred to in para 13 above,
is submitted for perusal
with reference to para 20 supra

27) The chief Engineer is not in favour of creating the Board for reasons stated by him and he says that the present arrangement may continue for some time, till better conditions are obtained

28) In this connection, it may be stated that the Trust Board have proposed to create an Executive Engineer in view of the directions issued in the last para of Govt of Fig A 31-10-47 sanctioning a scheme for underground drainage scheme in the old area of Mysore at a cost of Rs 8,81,660/-

28) Apart from this drainage work, the Trust Board have under their consideration the question of forming

Serial No

an Industrial Suburb in the Mysore South ~~Taluk~~ and a housing scheme. Hence the Trust Board have decided to create an Executive Division — Vide chairman's letter d 13/8/48 — flg 7

29) As the underground drainage work sanctioned in go d 31-10-47 is not yet taken up by the Board for execution as the question granting a loan to the Municipal Council in order to enable them to meet their cost of the scheme, is still under the consideration of govt and the question re the formation of the Industrial Suburb is also under order as these matters, the question forming an Executive Division may perhaps be taken up for consideration when the work pertaining to the above two schemes is actually taken up for execution. Necessary orders and the necessary chairman, engineering Improvement Trust Board requested

13/8/48

to review the proposals then submitted for orders with reference to para 210 above

Pr 13/6 134-149

in the light of the opinion furnished by the Chief Engineer for Roads & Buildings the proposal to form an Executive Engineer Division as attached to the above Board Mysore may be deferred It would otherwise mean establishment charges and it is not likely that the money required would be forthcoming from the Mysore appropriated for the Storage Scheme and in view of the very slender resources and that the articles required cement steel bricks & timber would be hard to procure sufficient quantity to undertake works of great magnitude and there is also scarcity of labour These are additional factors on the basis of which also the above proposal may be deferred for the present for orders

MYSORE CITY IMPROVEMENT TRUST BOARD.

NOTE.

Subject:- Constitution of an Executive Division, for the City Improvement Trust Board, Mysore.

The Government while according their sanction in G.O. No.L.10362-96/M1.38-46-155 dated 31-10-1947 for the comprehensive scheme of sewering the unsewered parts of Mysore City, though limiting its actual execution for the present for areas coming within the City proper involving an expenditure of Rs.8.8 lakhs, have called for proposals for constituting a Division for the actual execution of the scheme. The Housing Problem has been receiving the earnest and active consideration of the Board and a resolution has also been passed by the Board in their meeting held on 7-9-48 requesting Government to sanction adequate funds either as advance or loan at cheap interest to launch upon a scheme of constructing Thadike Houses to start with, for housing the menial and labour classes who are worst hit from the housing shortage now prevailing.

Secondly there is also an idea of constructing residential flats wherever some vacant patches of ground are available within the developed parts of the City proper, as an additional step to ease the housing conditions. These flats, would enable relatively small bits of vacant lands, scattered here and there being utilised to the best advantage by the construction of the maximum number of tenaments being put up, area for area, at comparatively economic investments. This housing work is susceptable of assuming a greater magnitude in the near future when the Trust Board may have to undertake the responsibility of putting up buildings on sites formed, instead of disposing the sites to the public as such. With this object in view Government have been requested to allot the full quota of cement and steel for Mysore City directly to the Trust Board so that these materials are utilised by the Board either for direct construction of houses under its management, or for being issued only to genuine house-seekers for residential purposes. Housing is one of the legitimate and most important functions of the Trust Board as contemplated in th

Act and it is in the fitness of things that the Board should devote their serious attention to explore all methods of mitigating the hardship devolving on the poorer sections of the public as a result of the prevailing housing scarcity.

The scheme for the construction of Thadike Houses for which sanction of the Trust Board has already been accorded is proposed to be executed on a more or departmental basis, the materials such as bamboos, poles, and timber being got supplied through the Forest Department and the other materials like bricks, jelly, Mangalore Tiles, slabs etc., and also the actual construction being arranged to be got done through piece-workers at agreed rates, to be decided upon by working out necessary datas in each case. This system will not only prove most economical but will also react very favourably on the strength and quality of construction. However such a course necessarily means a well directed and properly controlled organisation, and adequate staff with suitable powers to run it.

Coming to the scheme of Underground Drainage, though Government have limited its execution to an extent of 8.8 lakhs for the present, the absolute necessity of spending the other 16 lakhs of rupees to bring this scheme to completion is well recognised. In fact the Board have resolved that the entire scheme involving an expenditure of Rs 25 lakhs has to be compressed within a period of 5 years at best for its execution, and the Government have been requested to allot funds annually to make it possible. This scheme involves apart from the work of laying underground mains and sub-main sewers, the more important aspect of constructing the disposal works. It is these disposal works that have to be first taken up for execution before even taking up the work of laying the sewers. Recently a drive has been given for increasing the number of house connections in the parts of the City already sewered. This means a considerable increase in the flow of sewage through the existing sewers, and unless immediate action is taken to provide disposal plants to handle the full quantity of flow in a proper manner, a situation jeopardising the sanitary conditions will have been created. Though surveys are said to have been

made and a general scheme worked out for laying the main sewers and the construction of disposal works, dividing the City into 3 main Drainage Divisions, the necessity of going into this preliminary work in detail once again cannot be over-looked or belittled.

In addition to the above 2 very important aspects of work to be carried out under the auspieces of the Trust Board, there are also the usual improvement schemes some of which are no doubt of a major magnitude. The particulars of these works and the execution of these schemes need not be dealt upon at any length as the Trustees are aware of the same fully. Special mention may however be made about the scheme for forming a new suburb at Mysore south for which an initial stmnt is proposed to be made by acquiring an exten of about 400 acres of survey land as a first stage. This itself would involve an outlay of roughly Rs.10/- lakhs and this scheme is capable of considerable expansion in the immediate future.

Speaking from the financial point of view, the Trust Board Budget would tend to swell up considerably soon after the aforesaid schemes of Underground Drainage and Housing are inaugurated and taken up for actual execution. It will be no exaggeration to state that the approximate annual expenditure, when the above schem are kept going in full swing along with the other usual and day to day improvement works may reach a figure of say about 10 lakhs. However, to start with though there may not be a very striking rise in the outlay on works. there is plenty of spade work to be done before reaching the stage of actual execution in the scale as contemplated, and the present executive staff is really inadequate to cope up wnd meet the demands of such work in a satisfactory manner.

From a consideration of all the facts stated above, I feel that an Executive Division has to be created in the Trust BOARD in the interest of efficiency and satisfactory execution of all the important major schemes and works. When the Government have felt the necessity of a Division for the execution of only the Undergrou Drainage scheme, such necessity is felt with more force when we thi of the Housing scheme also in addition to the other routine improve ment Schemes.

The Government will therefore be requested to sanction the post of an Executive Engineer in the Trust Board to work as Trust Board Engineer Though there will be necessity to have atleast 2 Assistant Engineers with corresponding lower subordinate STAFF to function as two sub Divisions within the Division as proposed under the Executive Engineer when all the schemes are kept going in full swing, it is however proposed to take only one graduate surveyor for the present. The Executive Engineer will be for the time being in direct charge of the Housing scheme and the Officer to be lent from P.W.D.. to work as Assistant Engineer against the post of the present sanctioned establishment will be in charge of the Drainage sub Division for purely Underground Drainage scheme under the control of the Executive Engineer. As regards the st ordinate staff. the existing number of hands along with the addi tions of one graduate surveyor will be distributed properly by a suitable redistribution of work. The strength of the subovers which is at present six may be increased later, as and how new schemes are launched upon for actual execution.

A statement of financial commitment of the proposal detai. above, is enclosed for kind information. It may be stated here for purpose of comparison that the expenditure on establishment i the case of Mysore Buildings Division the same jurisdiction as th Board, where an outlay of Rs.16 lakhs. is ascertained to be Rs.80,00 roughly. It is therefore clear that the increased expenditure re sulting from the present proposal of reorganisation is well within the reasonable proportions and its necessity in the interest of wor execution in the different important activities of the Trust Board on the scale contemplated is apparent. Kind approval of the Trus tees for the proposal is requested.

(Sd.) P. Sitaramiah.
